Résumé

Matthias Lischka

PROFESSIONAL EXPERIENCES

Senior Software Developer at TechTalk, 10/2014 – 09/2018

Since 2014 I was sent to different customers on location to support their software development teams. This included research and development, classical software development, leading teams as technical lead, train people on TDD/BDD (Specflow) and Git, ensure code quality, Scrum Master and supporting requirement engineering.

In addition I was involved in many bids within Techtalk, offering technical concepts and rough estimations for large-scale projects.

Software Developer at Techtalk, 03/2010 – 09/2014

After an internship at Techtalk I was hired as Software Developer to continue supporting the team I started in. In the beginning I was writing BDD tests (Specflow) and small features, followed by bigger features and working independently. Next I was maintaining and extending legacy applications for our customers.

LAST PROJECTS

FONDS SOZIALES WIEN, 2016 – 2018

Technical lead of a seven-person team, intermediate Scrum Master in the beginning. 4 Scrum teams à 7 people, Scrum of Scrum.

Areas of responsibility: Quality of code, technical coordination with other teams, revision of requirements, planning and rough estimation of upcoming projects, co-creation of overall architecture, developing features, prototyping & proof of concept.

Technical setup: C# .Net Core Web API Microservice Backend with CQRS and MSSQL, Angular Micro-Frontend, several legacy applications with ASP.Net Webforms and Oracle, data migration, Microsoft Azure DevOps

RUBICON, 2014 – 2016

Started in "Research & Development" branch. After that I was reassigned to support a critical project (Bundesministerium für Inneres). 3 Scrum teams à 7 people, Scrum of Scrum.

Areas of responsibility: Planning and implementation of features in ActaNova, rough estimations of backlog and upcoming packages, pull requests and quality of code.

Technical setup: ActaNova, C# .Net, ASP.Net Webforms, SOAP Service Interfaces, MSSQL
